DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Charles Elderkin on 06/27/08.
3. The application has been amended as follows:
 - a. Claim 1, lines 6-8: delete "angle, and first", add –angle; first–.
 - b. Claim 1, lines 17-19: delete "guiding water, wherein", add –guiding water; and a stop extending parallel to the roof portion and between the first and second flanges to form a channel between the stop and the roof portion; wherein–.
 - c. Cancel claim 5.
 - d. Claim 6, line 1: delete "claim 5 wherein", add –claim 1 wherein–.
 - e. Claim 6, line 2: delete "is parallel to the roof portion, ",
 - f. Claim 10, line 22: delete "guiding water, wherein", add –guiding water; and a stop extending parallel to the roof portion and between the first and second flanges to form a channel between the stop and the roof portion; wherein–.
 - g. Cancel claim 15.
 - h. Claim 16, line 1: delete "claim 15 wherein", add –claim 10 wherein–.

- i. Claim 16, line 2: delete "is parallel to the roof portion, the stop".

Allowable Subject Matter

4. Claims 1-4, 6-7, 9-14, 16-17, 19-20, and 26 are allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:
6. Givens discloses a flashing device with a flat roof portion and first and second flanges. Givens does not disclose that both flanges of the flashing device extend perpendicularly from the roof portion, that the flanges have substantially equal rectangular outlines, that the flashing is substantially symmetric about a plane bisecting the obtuse angle between flanges, that the flashing is configured to be installed in either of two alternative orientations, or that the flashing includes a stop parallel to the roof portion and extending between the two flanges to form a water channel.
7. The flange shape and symmetry seem to be obvious matters of design choice.
8. Altering Givens so that both flanges extend perpendicularly would also be an obvious matter of design choice, since it would allow the flashing member to be symmetrical and thus to be used on with a wall on either side of the roof.
9. Givens does not disclose a stop parallel to the roof portion and extending between the two flanges to form a water channel, and it would not be obvious to provide Givens with such a stop.

10. Hunter teaches a single-flanged flashing with a lip that could be considered a stop.

However, the "stop" of Hunter is not meant to channel water, and it would not have been obvious to take the lip of Hunter and apply it to Givens such that it extended between the two flanges. It may be obvious to apply the lip of Hunter to one of the flanges of Givens, but this would not meet the claim limitations.

11. All other prior art of record fails to teach a flashing member closer to that of the instant invention, or a stop member that extends between two flanges at an obtuse angle.

12. It would not have been obvious to modify Givens by adding a stop member that extends between the flanges of the flashing, since there is no motivation in the prior art and it is not well-known to do so. Any modification to Givens that would arrive at the invention would require improper hindsight.

13. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
